

Retaining Walls & Groundworks

Halcyon Landscapes design and build strong retaining walls and carry out reliable groundworks across Bradford and West Yorkshire. We ensure your garden is safe, level, stable and ready for long-lasting use.

Professional Groundworks Services

We carry out all aspects of domestic groundworks including site clearance, excavation, soil removal, footings, foundations, trench digging, levelling, compaction and sub-base installation.

Retaining Wall Construction

We build durable retaining walls using natural stone, concrete blocks, brick, masonry or timber sleepers. Every wall is constructed with proper footings, drainage allowances and strong structural support.

Terracing & Level Changes

We turn sloping or uneven gardens into usable terraces, steps, raised beds and level zones that improve accessibility and make the most of the space.

Drainage & Water Management

We install French drains, soakaways, retaining wall drainage and landscape regrading solutions to prevent standing water and protect your garden structures.

Why Choose Halcyon Landscapes?

- Skilled groundworks specialists
- Safe, accurate excavation and construction
- High quality materials
- Long-lasting, stable results
- Honest pricing and clear communication
- Fully insured local team
